Art Unit: 1724

Claim 5 is rejected under 35 U.S.C. sec.112, second paragraph, for failing to particularly point out and distinctly claim the subject matter for which patent protection is sought.

The metal oxide Markush groups cited in claim 1 and claim 5 are inconsistent.

Accordingly, the scope of claim 5 could not be ascertained with a reasonable degree of precision. Correction is required.

JP 59-115786 recites treatment of phenol-bearing wastewater using metal oxide catalysts, e.g., titania or zirconia, for example. It is not clear whether the phenol-bearing wastewater is a biomass hydrolysate, or if the phenol is derived from biomass.

Respectfully,
